SAFETY WARNINGS

WARNING

Read all safety warnings and instructions. Failure to follow the warnings and instructions may result in injury and/or property damage. Save all warnings and instructions for future reference.

The warning and safety instructions in this manual are not meant to cover all possible conditions and situations that may occur. Common sense, caution and care must be exercised when operating or cleaning tools and equipment. Always contact your dealer, distributor, service agent or manufacturer about problems or conditions you do not understand before operating the product.

- Stand Up Paddle (abbreviated SUP) boards can be very dangerous and physically demanding. The user of this product should understand that participating in stand up paddling may involve serious injury or death.
- Seek SUP instruction from a licensed or certified instructor.
- Always check weather forecasts prior to using the SUP board. Never use the SUP board in thunderstorms and lightning conditions.
- Always use appropriate protective gear and wear a personal flotation device. Wear the correct protective clothing for the conditions such as a wetsuit or a UV top. Cold water and cold weather can result in hypothermia. Always carry identification.
- Wear a helmet when appropriate.
- Do not exceed the maximum weight capacity.
- Do not operate the SUP board under the influence of drugs and/or alcohol.
- This model is designed to be used in flat waters (lake, rivers, sea shore) in standing and seating position. It is not recommended to use the SUP board in high waves nor for surfing.
- Beware of offshore winds and currents as they can take you out to sea.
- Tie the included leash to your SUP board at all times.
- Check your equipment prior to each use for signs of wear, leaks or failure.
- Do not allow children to use the SUP without adult supervision.
- Always inform someone your paddling route, the time and place of departure and your intended time and place of arrival. Paddling alone is not recommended.
- Never leave your SUP board for an extended period of time on a warm surface like a beach or other surfaces. This can cause damage to your board.

SAVE THESE WARNINGS.

ASSEMBLY

INFLATING THE PADDLE BOARD

1. Remove all sharp edged and pointed objects from the surface in order to avoid damaging the SUP board.
2. Inflate the SUP board with the included hand pump.
3. Unscrew the valve cap 1 . Push the button 2 in and turn approximately 90 degrees so it is in the “OUT” position.
4. Insert the pump hose end piece and inflate it until you will reach the required pressure. After inflation tighten all the valve cap (clockwise). Only the valve cap can ensure final AIR TIGHTNESS.
5. To release air from the SUP board, remove the valve cap 1 and push the button 2 in and turn approximately 90 degrees so it is in the “IN” position.

WARNING: The correct pressure for this SUP board is maximum 1 bar / 15 PSI (=1000 mBar) DO NOT EXCEED THIS.

WARNING: Using an electrical pump or air compressor is at your own risk. This can lead to damaging the SUP board.

DETACHABLE SKEG ON BACKSIDE OF SUP BOARD

It is recommended to use the detachable skieg in deep water, where it will allow you to move forward in a straight line. Do not use it in shallow water because then the skieg can hit the bottom. The Skieg can be placed on the SUP board if this is inflated or deflated. To assemble the skieg push the skieg in the black part on the back side of the SUP board. To lock the skieg push the lock pin in the skieg base hole.

ASSEMBLY AND MAINTENANCE

ASSEMBLY INSTRUCTIONS INCLUDED PADDLE

The included paddle consists of 3 pieces. To adjust the paddle to the required length:

- Insert the bottom of pole 2 in to the top of pole 3. This can be fixed when the pin on pole 2 is clicked in the hole of pole 3.
- Open the button on top of pole 2 by pulling the button.
- Insert the bottom of pole 1 and choose the length that suits you. Click the pin (behind the button) of pole 2 in to the hole of pole 1.
- The paddle length is adjustable from minimum length 1.70 mtr to maximum length 2.10 mtr.

ATTACHING THE LEASH

Before you start to use the SUP board first attach included leash to the SUP board and yourself.

- Attach the leash to the metal ring on top of the SUP board.
- Attach the other side of the lease to your ankle. When you fall in the water the leash ensures that the SUP board will not float away.

MAINTAINING THE SUP BOARD

- Clean and check the SUP board and all accessories. Use a mild, non scouring cleanser.
- Make sure the SUP board is completely dry before placing it in the backpack. Otherwise this may cause mold, foul odor and the skin/hull or the inside chambers of the SUP board will suffer from water damage.

REPAIRS

Although the SUP board has been manufactured of a reinforced and tough material, it is still possible to cause holes or cracks when the SUP board is handled improperly. For the repair of a small damage a repair kit is included.

- Prepare a round patch with repair material with correct measurements.
- Clean the repair material and the area around the leak with alcohol.
- Apply 3 thin, even coats of glue to both the surface of the board and the repair material. Wait 5 minutes between each coat.
- After the 3rd coat, wait 10-15 minutes before applying the repair material. Use a handroller to apply the repair material evenly. Pay special attention to the edges
- Wait at least 24 hours before re-inflating.

DISCLAIMER

PLEASE READ THE FOLLOWING CAREFULLY

THE MANUFACTURER AND/OR DISTRIBUTOR HAS PROVIDED THE PARTS LIST AND ASSEMBLY DIAGRAM IN THIS MANUAL AS A REFERENCE TOOL ONLY. NEITHER THE MANUFACTURER OR DISTRIBUTOR MAKES ANY REPRESENTATION OR WARRANTY OF ANY KIND TO THE BUYER THAT HE OR SHE IS QUALIFIED TO MAKE ANY REPAIRS TO THE PRODUCT, OR THAT HE OR SHE IS QUALIFIED TO REPLACE ANY PARTS OF THE PRODUCT.
